# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

#### Methods and materials for containment and cleaning up

Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

## Section 7. Handling and storage

**Precautions for safe handling** Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

#### Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

### Section 8. Exposure controls/Personal protection

Control parameters (biological limit values or exposure limit values and source of those values)

## Exposure limits: None

## Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

#### Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Chemical stability         Stable under the recommended storage and handling conditions prescribed.         Possibility of hazardous reactions         None known.	Reactivity				
Stable under the recommended storage and handling conditions prescribed.         Possibility of hazardous reactions         None known.	Does not react under the recommended storage and handling conditions prescribed.				
Possibility of hazardous reactions None known.	Chemical stability				
None known.	Stable under the recommended storage and handling conditions prescribed.				
	Possibility of hazardous reactions				
Conditions to avoid (static discharge, shock or vibration)					
None known.					
Incompatible materials					
Oxidizing materials; etc.					
Hazardous decomposition products					
None known					

Section 11. Toxicological information					
Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact)					
Causes mild skin irritation. Causes serious eye irritation.					
Symptoms related to the physical, chemical and toxicological characteristics					
Skin irritation, redness, stinging, pain; Eye irritation, redness, tearing.					
Delayed and immediate effects (chronic effects from short-term and long-term exposure)					
Skin Sensitization – No data available;					
Respiratory Sensitization – No data available;					
Germ Cell Mutagenicity – No data available;					
Carcinogenicity – No ingredient listed by IARC, ACGIH, NTP or OSHA;					
Reproductive Toxicity – No data available;					
Specific Target Organ Toxicity — Single Exposure – No data available;					
Specific Target Organ Toxicity — Repeated Exposure – No data available;					
Aspiration Hazard – No data available;					
Health Hazards Not Otherwise Classified – No data available;					
Numerical measures of toxicity (ATE; LD <sub>50</sub> & LC <sub>50</sub> )					
None					
ATE not available in this document.					
Section 12. Ecological information					
Ecotoxicity (aquatic and terrestrial information)					
No data available for the product.					
Persistence and degradability No data available					
Bioaccumulative potential No data available					
Mobility in soil         No data available					
Other adverse effects     No data available					
Section 13. Disposal considerations					
Information on safe handling for disposal/methods of disposal/contaminated packaging					
Dispose of contents/container into safe container in accordance with local, regional or national regulations.					
Section 14. Transport information					
UN number; Proper shipping name; Class(es); Packing group (PG) of the TDG Regulations					
NOT REGULATED					
UN number; Proper shipping name; Class(es); Packing group (PG) of the IMDG (maritime)					
UN number; Proper shipping name; Class(es); Packing group (PG) of the IMDG (maritime) NOT REGULATED					
UN number; Proper shipping name; Class(es); Packing group (PG) of the IATA (air)					
NOT REGULATED					
Special precautions (transport/conveyance)         None					
Environmental hazards (IMDG or other) None					
Bulk transport (usually more than 450 L in capacity) Possible					
Section 15. Regulatory information					
Section 15: Regulatory information           Safety/health Canadian regulations specifics         Refer to Section 2 for the appropriate classification. This product has been classified in accordance					
with the hazard criteria of the Hazardous Products Regulations (HPR).					
Environmental Canadian regulations specifics Refer to Section 3 for ingredient(s) of the DSL					
Safety/health/environmental outside regulations specifics					
United States OSHA information: This product is regulated according to OSHA (29 CFR).					
United States EPA (Environmental Protection Agency) information: 40 CFR Refer to the ingredients listed in Section 3 & Sections 12; 13 & 14.					
United States TCSA information: Refer to the ingredients listed in Section 3.					
National Fire Protection Association (NFPA):					
HEALTH: 1 FLAMMABILITY: 1 INSTABILITY: 0 SPECIAL HAZARDS: Refer to Section 2 & 3.					
HAZARD SCALE: $0 = $ Minimal $1 = $ Slight $2 = $ Moderate $3 = $ Serious $4 = $ Severe					
California Proposition 65: This product does not contain traces of a material that is known to the State of California to cause cancer or other reproductive					
harm.
